Description

BTS7960 High Power H-Bridge motor driver 43A

The Motor Driver 43A BTS7960 uses an H-bridge driver module that composed by Infineon power drive chip, with overheating and overcurrent protection. Double BTS7960 H-bridge driver circuit, with strong drive and braking effect, uses 74HC244 chip to effectively isolate the microcontroller and the motor driver. It can operate at high current up to 43A

Quick Spec

- Input voltage: 6V-27V
- Model: IBT-2
- Maximum current: 43A
- Input level: 3.3-5V
- Control mode: PWM or level
- Duty cycle: 0-100%
